This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

LIST OF DOCUMENTS AND REPORTS PRINTED ANNUALLY OR AT REGULAR INTERVALS IN PURSUANCE OF LAW.

The table shows those that appear regularly in the Congressional series. Columns 1 to 7, inclusive, show the extra numbers that are printed, the allotment to each House, to each individual member, and to the office which compiled the document. All of these documents are cloth bound, and the Congressional numbers which appear on the "usual number" of the same are omitted.

Columns 8 to 17, inclusive, show the "usual number" and the distribution of the same. Congressional numbers are assigned to this edition only.

Detailed lists are appended which show the distribution of the Official Register, or "Blue Book," the Official Gazette of the Patent Office, Maps, Charts, and Atlases, the Congressional Record, the Revised Statutes of the United States and Supplements thereto, the Session Laws, and Statutes at Large.

The table does not include such documents as may be ordered specially from time to time by joint or concurrent resolutions, nor does it include documents printed upon requisition of the heads of Executive Departments or other offices.

Documents printed upon the requisition of heads of Departments or offices are not given Congressional numbers. Provision is made in section 58 of the printing act of January 12, 1895, for the printing of 500 extra copies of all such documents, except those of a confidential nature or intended solely for official use, for distribution to designated depositories. This extra number is not printed, however, if the same matter has previously been printed as a Congressional document.
